Theme										
CI theme: (Write about the semester theme 'ecosystem restoration' in your own words.) (50–150 words)	This semester our CI theme was ecosystem restoration. Ecosystem restoration means protecting the remaining intact ecosystems and helping to restore those that have been damaged or destroyed. The main purpose of ecosystem restoration is to support nature and help it recover from destruction. Restoration can happen in many ways — for example, by planting more trees or using less harmful products so that our environment can recover. We should be more active in ecosystem restoration; otherwise, there will be an alarming reaction from nature.	01								
Group / Individual theme: (What was your theme? Why did you choose this theme?) (150–250 words)	Our theme was to represent the consequences of human actions on nature. There was a jungle, which was symbolic of a powerful force in our environment. On the other hand, there was a model who symbolized humanity, representing how people are destroying nature for their own good. We mainly wanted to show that we destroy nature but forget that we are nothing without it. Nature is an important part of our life and our humanity. Yet we keep destroying it, and at the end of the day we realize our mistake and mourn it. Nevertheless, by the time we realize, it is already too late. That is why we want to tell people to be wise before they destroy nature. We should improve our humanity day by day with the help of nature, not by destroying it. We also chose this topic to encourage people that it is not too late — to be aware and to improve our sense of responsibility.	02								

Question	Answer	Point
Artwork		
Layout & Plan: <i>(Attach the image of your layout.)</i> <i>(Why, and what kind of fashion did you want to do?)</i> <i>(150–250 words)</i>	I chose to represent the jungle. I chose the jungle because jungles are being destroyed more and more often, and no one cared until global warming began to rise. That is why I wanted to represent the jungle. To create the jungle look, I had to use a lot of green leaves. To make the green leaves, I used some unused green clothes. I made the leaves from these clothes, and I also made some butterflies out of paper. After making these, I used color to make the dress prettier and more eye-catching. I also wore a pair of wings. The wings were used, so I reused them; when I found them, they were not wearable, so I applied my painting skills and colored them. As for the shoes, they were my broken shoes, which I had bought when I was in class 9 or 10 and were no longer wearable. But I glued my paper butterflies onto the shoes and then wore them on the runway!	02
Production: <i>(Please write about the production process from the beginning: the materials you used, the place you worked at, any obstacles you faced, any improvisation you did, and how the result came out in the end.)</i> <i>(Please attach some images of your production process.)</i> <i>(300–400 words)</i>	We did our work at my place (Faria Akter's place). We had a lot of fun. We were quite worried about finishing our dresses because there were only three members on our team. But when we started our work, our tension began to grow. There was a lot to do! We had to make four dresses and two pairs of shoes, but somehow we managed to finish on time. We used old clothes, a glue gun, broken shoes, colors, paper, and so on. There was one interesting moment while we were working together. I get angry very quickly, so one day, when I was trying to explain to my teammates what I wanted and they could not understand, I got upset and stopped talking to them altogether. Then my mom came and offered us "khichuri." She said that if we had some food, we would be able to work peacefully again. And it is true — it worked like magic, and I was calm again after the meal. It was one of the funniest and most memorable moments for me. I wish we could go back to that time and enjoy it more and more.	04
Exhibition		
Exhibition: <i>(Where was the show? How was the platform? Who were the spectators? Was any other platform better for the show, and why?)</i> <i>(Please attach some images/screenshots of your final work and the show.)</i> <i>(150–250 words)</i>	The show was held on ULAB's permanent campus, so our platform was the Red Building. The platform was good, but it could have been more beautiful with a little more decoration, as there was very little carpet. In my opinion, more carpet would have been very helpful for the models. The guests were also seated in the sunlight, so it would have been great with more facilities for the audience. Nevertheless, I think the show would have been prettier and more eye-catching if we could hold it on our playground — for example, by building a platform in the field with carpet along the whole walkway. Then it would be beautiful to see a runway where models represent the values of nature in the middle of nature itself. We could also arrange seating for the audience inside the field, along with some food for the guests outside the ground.	02

Realization		07

Question	Answer	Point
Realization: <i>(Did you get all the feedback from the audience that you expected? Did the viewers get your message? Please explain why or why not they got it. What have you realized about your success in the end? How would you do the fashion if you did it again? What were the strengths of your work, and why? What were your faults? How can you avoid them next time? What are your thoughts about this project?)</i> (400–500 words)	I am actually quite happy, because everyone who gave me feedback gave me very good reviews. Everyone was talking about my dress; they loved it a lot, and I loved it too. I wanted to show people that you can make something wearable and still represent a message. I wanted to show that you do not need to be bulky to represent something — you can make a dress and convey your message without confusing people. I guess I succeeded in this. The most interesting thing is that everyone understood my message just by looking at my dress and my ramp walk. I am very grateful to God for giving me the ability to do this work properly, and I was very happy with my work. The only thing that made me a little sad is that no one praised or mentioned my shoes; I really put a lot of effort into making them wearable, and people may not have noticed them. But I am very happy with the reviews. If we do the Trashion Show again, I think our instructors should start their work on time, because they delayed a lot. We could also switch the venue to the field, which might be a good idea. That is all I have to say. Thank you for giving me the opportunity to express myself.
